SUMMARY

Senior Software Engineer with 6.5+ years of experience building mobile (React Native) and web (React.js) applications. Most of my work has been on the frontend and mobile side — building features, improving performance, handling state management, and shipping apps to the App Store and Play Store. I also have knowledge of Node.js and am comfortable taking on backend tasks when needed, though my core strength is on the mobile and web front. I have worked in both product-led and enterprise teams, mentored junior developers, and delivered features end-to-end in Agile setups.

TECHNICAL SKILLS

Mobile: React Native, iOS, Android, Android Studio, Xcode, Realm DB, Firebase

Frontend: React.js, JavaScript (ES6+), TypeScript, HTML, HTML5, CSS, CSS3, Redux, Redux Toolkit, Redux Thunk, Context API, React Query, React Hooks

Backend (knowledge): Node.js, REST APIs — comfortable taking on backend tasks when needed

Databases: MongoDB, MySQL

CI / CD: Jenkins (web), Bitrise (mobile), GitHub Actions (web)

Tools: Git, GitHub, Jira, Asana, Crashlytics, New Relic, Firebase Analytics

App Distribution: App Store (iOS), Google Play Store (Android)

EXPERIENCE

Senior Software Engineer | TO THE NEW, Noida, India

Aug 2024 – Dec 2025

- Worked on cross-platform mobile apps for Android and iOS using React Native — handled new features, bug fixes, and performance improvements.
- Built and maintained web application features using React.js for enterprise clients.
- Managed state using Redux, Redux Toolkit, and Context API across complex app flows.
- Set up and maintained mobile CI/CD pipelines using Bitrise for automated builds and deployments.
- Used Jenkins and GitHub Actions for web app CI/CD, automating build and deployment workflows.
- Integrated REST and GraphQL APIs from the frontend side; worked closely with backend teams on data flow and API contracts.
- Fixed production crashes and performance issues through profiling, debugging, and monitoring with Crashlytics and New Relic.
- Built reusable components to keep the code clean and easy to maintain.
- Did code reviews, helped junior developers, and followed good practices around architecture and code quality.
- Worked in Agile with product, QA, and backend teams to deliver features on time.

Software Engineer | CarDekho Group, Gurugram, India

Mar 2022 – Apr 2024

- Developed and improved React Native apps for Android and iOS — mainly dealer management and lead management platforms for South East Asia.
- Built web features using React.js for dealer operations, insurance, and loan management systems.
- Integrated RESTful and GraphQL APIs on the frontend, keeping data in sync across platforms.
- Used Realm DB to store data locally on mobile for offline support and faster load times.
- Worked in Agile sprints using Jira alongside product, QA, and backend teams.

Software Engineer | NMG Technologies, Gurugram, India

Nov 2020 – Mar 2022

- Built mobile (React Native) and web (React.js) apps for a social networking platform (Vouch) and a fintech fund management app (Wealth Concert).
- Handled state management using Redux and Redux Thunk for real-time updates and complex data flows.
- Integrated Firebase for login, push notifications, analytics, and real-time data.
- Added social login (Google, Facebook) to make the onboarding flow simpler.
- Connected REST APIs for user data, financial transactions, and social features.
- Improved app performance and responsiveness on both mobile and web.

Software Engineer | Affle India, Gurugram, India

Apr 2019 – Oct 2020

- Developed mobile (React Native) and web (React.js) apps for an e-commerce platform (Sunny E-Store) and a health-tech app (Niine).
- Built product listing, search, cart, and checkout features for the e-commerce app.
- Implemented cycle tracking, reminders, and predictive insights for the Niine health app.
- Connected REST APIs and third-party services for payments, orders, and health data.
- Integrated Firebase for authentication, push notifications, and analytics.
- Worked on performance improvements to make both apps faster and smoother.

PROJECTS

Aramex — TO THE NEW

Stack: React Native, React.js, TypeScript, Redux, React Query, REST APIs, Bitrise, GitHub Actions

- Worked on a large-scale logistics and shipment tracking platform — mainly on mobile (React Native) and web (React.js).
- Integrated REST APIs and improved how data flows between the frontend and backend.
- Set up CI/CD pipelines using Bitrise for mobile and Jenkins and GitHub Actions for web.
- Refactored parts of the codebase to improve readability and long-term maintainability.
- Fixed production bugs and monitored app health using Crashlytics and New Relic.

DaMENSCH — TO THE NEW

Stack: React Native, React.js, TypeScript, Redux Toolkit, GraphQL, Firebase, New Relic

- Worked on an e-commerce platform for men's apparel — focused on mobile (React Native) and web (React.js) frontend.
- Integrated GraphQL and REST APIs for product listings, authentication, order management, and payments.
- Used Crashlytics, Firebase Analytics, and New Relic to track and fix production issues.
- Handled state management using Redux Toolkit for complex user interactions.

OTO Dealer & OTO SFA — CarDekho Group

Stack: React Native, React.js, TypeScript, Redux, Realm DB, GraphQL, Firebase

- Worked on dealer management (OTO Dealer) and loan/insurance lead management (OTO SFA) apps for South East Asia.
- Used Realm DB for local data storage and offline mode on mobile.

Vouch & Wealth Concert — NMG Technologies

Stack: React Native, React.js, Redux, Redux Thunk, Firebase, REST APIs

- Built a social networking app (Vouch) and a fintech fund management app (Wealth Concert) for Android, iOS, and web.
- Worked on social feeds, likes, comments, user profiles, fund distribution, and transaction tracking.

Niine & Sunny E-Store — Affle India

Stack: React Native, React.js, Redux, Firebase, REST APIs

- Built a period tracking and ovulation calendar app (Niine) and an e-commerce gadget platform (Sunny E-Store) for Android, iOS, and web.
- Implemented cycle analytics, cart/checkout flows, Firebase authentication, and third-party payment integrations.

EDUCATION

Bachelor of Technology, Computer Science | College of Engineering Roorkee | 2013 – 2017
